Experience

July 2014 - PRESENT

Infosys Ltd

Project: #1 (Duration: Aug 2015 to till date) – Implementation and post production support

Environment: Oracle Applications 11i/R12

Responsibilities:

- Developed concurrent programs to send SDM Summary Report, Shipment Summary Report through Email with UTL_SMTP connection.

- Designed and developed a Form UI to schedule, split, quantity change and warehouse change for a Sales order line by loading the values in a staging table with the help of a SQL* Loader program. A validation program was created to process records, an error report program was designed with XML BI Publisher using Bursting technique and an email program was created to send email to the requestor using Shell Script (MAILX command).
- Involved in Sales order conversion program to old entity load sales orders into OM Interface tables by creating staging table, performing validations and finally loading into OM Interface tables (OE_HEADERS_IFACE_ALL, OE_LINES_IFACE_ALL, OE_ACTIONS_IFACE_ALL)
- Worked in Processing Constraints and Form Personalization to gate Sales Orders in Interface, to prevent Sales orders being Cancelled through Change orders/Online and worked in setting up default value of Warehouse with Defaulting Rules concept
- Involved in the analysis of the assigned support tickets including replicating the issue, analysing the custom processes/API's/reports/forms and updating the ticket with the appropriate information.
- Work on the development activities as part of issue resolution. Perform Unit Testing, migrate to next environments, assist user testing and closing the tickets.

Project: #2 (Duration: 9 months)

Environment: Oracle Applications R12

Responsibilities:

- Creating PL/SQL Packages, Procedures, Functions as per project requirements.
- Designed and developed an Outbound program. The scheduled ASN Outbound program will load the deliveries into the ASN outbound custom table.
