Operating Systems	Windows XP Professional.Windows 10 Windows 2000. Unix
Tools	Eclipse Photon WSAD5.1,WAS RAD 6.0,7.0,Tomcat Smart CVS,Git Android Studio
Database(s)	Oracle8i and 9i, MySQL Server,Microsoft Access,DB2
Technology	Core Java 8, JSP,Servlets, Spring Core and Spring MVC,Hibernate,Maven Restful Webservices,Android Programming PL\SQL,MySQLs,VB.

Career History

Duration	Organization	Role
August 2005 – September 2009	Tech Mahindra Ltd.	Technical Associate.
June 2011- March 2012	Capgemini	Consultant.

**Assignment
History****SMS Campaign (Freelance) – 2018**

Implemented a Java Swing application for SMS campaign where the offers were sent to the customers on their birthdays and anniversaries apart from the monthly offers using the sms.

Integrated the SMS API from Msg91 sms service provider in the swing application.

SeeuSoon App Development (Freelance) - June 2016 to June 2017**Business Layer development for SeeuSoon App:**

A contextual contact management app which relies on doing a context based searches for the contact which otherwise are not stored by the user.

Developed APIs for registration, search and post modules. All REST based services were developed for the Android app to consume.

Capgemini India Pvt Ltd - June 2011 – March 2012**Rail Europe reservation system:****Core Euronet application:**

This application had a swing interface as Euronet client which communicated with the Euronet server through a facade for making the booking for one-way, round trip or multicity. Using this application, bookings are made for SNCF (France), RENFE (Spain), ATOC (Britain) and Deutsche Bahn(Germany)trains.

The printing of the ticket was handled by another application named ATB.

Environment: Core java, EJB, WAS6, RAD7, Oracle.

As developer in above application was responsible for the following:

1. **Had been onsite (White Plains, USA)** for knowledge transition.
2. Raised queries and simultaneously helped team members for understanding the application.
3. Worked on EOY release requirement while still doing the knowledge transition by preparing the impact analysis, detailed design, coding and unit testing.
4. Worked on Barcode requirement and analyzed, coded and unit tested the same.
5. Worked on various issues of the client using the issue management tool i.e. JIRA.
6. Coordinated with the web services team, database team and the Business Analyst team for understanding the application and solve the queries.

Tech Mahindra Ltd - January 2007 – April 2009**Provided support for the below applications:**

DSCAT – Data Services Circuit Assignment Tool, **LDCAT** – Long Distance Circuit Assignment Tool and **CIBNA** – Circuit Identifier & Billing Number Assignment Tool:

All the above tools are java based web applications which provide new circuit identifier number assignments for special access lines for SBC Long Distance.

ECATS – Enterprise Circuit Administration and Tracking System tool:

ECATS facilitates the entry, maintenance, tracking and reporting of all contract details from a post-sales perspective.

VOW – Voice Order Webtool:

Voice Ordering Web Tool (VOW) is a database management system that provides web-based forms utilized by the Dallas Customer Care (DCC) Service Representative to process service requests for Mass-Market customers (Consumer and Small Business).

Environment: Core Java, JSP, Servlets, EJBs, PLSQL, VB6, WSDL, WSAD 5.0, RAD6, WAS6, UNIX, DB2, Oracle, MSACCESS.

As a developer in all the above applications was responsible for the following when working on the work request:-

- Preparation of the Impact Assessment document and Technical requirement document.
- Preparation of the System Feature document and Detailed Design document.
- Implementation of the code enhancements using WSAD for WAS5 and RAD6 for WAS6.
- Preparation of the Unit Test Plan and RTM documents.
- Preparation of the peer review log documents.
- Installation of the applications on development, auxiliary, test and the production servers.
- Check-in the code to CVS.
- Preparation of the SCM documents.
- Modifying the WSDL file for the DSCAT application to comply with the AT&T standards.
- Preparation of ms access reports for the VOW application when it got retired.
- Working on the vanities related to the applications.
- Providing information and solutions to the queries raised by the clients.
- Writing the shell script to automate sending of mails and schedule the same.
- Providing the test data to the testers.
- Monitoring the logs of the applications on daily basis.
- Providing knowledge of the applications to the new team members.

1. September 2005 – Jan 2007

Internet Services Application – CRM Archiving and ASMS System for AT&T (merged with SBC Services Inc.), NEW YORK, USA
