## DECLARATION

---

I hereby declare that the above written particulars are true to the best of my knowledge and belief.

PLACE: MUMBAI

(SHAIKH NOOR FATIMA)

## **Salutation,**

Whomsoever it may concern,

To the place I find myself today standing where in bringing the product of a company to be bug free and with least error to be found to bring them to none.

With a huge project to work with past these years which includes many domains to work on, with different aspects, views and perceptions and with various scenarios to take forward solely and meet the close deadlines along with the feedback and request response ratios to stand with the eye of a bird to get the minute things figured out.

Skilled to work on the below:

- Web Apps, Websites and Mobile Applications
- Domains worked & knowledge: Telecommunication, Banking, E-commerce
- Testing based on: CRM testing, Mobile Testing, Payment Gateway Testing, API Testing

Work head to toe with:

- Create and Design and updating Test Cases and Test Scenarios for new product/ service development.
  - Creating Test Environment and tracking the Status of the logged errors and bugs and defects to the development team and taking the logged defects till the last stage of being resolved.
  - Testing of Mobile Applications (android and Ios) both functional and non\_ functional tests.
  - Execute Test Cases and parameters to take the testing process on and update the same on daily basis as it is a CI/ CD environment.
  - working with the SDLC and STLC lifecycles.
  - Work along with the development team to meet the deadlines and track backlog items.
- Investigating defects, reproducing problems and documenting findings.
- working with the CI / CD Lifecycle (Request and Response received from the end user).
  - Taking feedbacks from the stakeholders.
  - Resolving errors and Requests of the end users of the product. Working more closely with the stakeholders and taking feedbacks to make the product more effective.
  - Testing of API's (by using POSTMAN)
  - Creating and maintain a database for the logged and encountered bugs, errors and defects.

Sincerely

Shaikh Noor Fatima
