Objective

Looking forward for exposing my proficiency in various fields of Computer Science and Engineering, Software as well as my technical skills through an opportunity in an organization which provides challenging projects.

Professional Experience

Having around 2+ Years of experience in Product Development as Software Engineer using Java, Java EE technologies.

- ✓ Worked as a Graduate Engineer Trainee in Gas Turbine Research Establishment-DRDO Ministry of Defence Bangalore.

Experience summary

- ✓ Designed & Developed Cloud-native JAVA applications on Pivotal Cloud Foundry.
- ✓ Hands on experience working with SpringBoot & Micro-service driven architecture.
- ✓ Hands on experience CI & CD Process.
- ✓ Experience in developing web applications and enterprise applications using Java SE, Java EE (SERVLET, JSP) technologies.
- ✓ Extensively working on micro services development using Spring Boot Framework.
- ✓ Experience with servers like Tomcat.
- ✓ Hands on Experience on Spring IOC container and Spring MVC.
- ✓ Hands on Experience on Spring Boot.
- ✓ Having the knowledge on UI technologies like HTML5, CSS.
- ✓ Implemented Project using Microservices and used Eureka.
- ✓ Experience in working with Restful services using Jersey and Rest easy.

Education

B.Tech in **Computer Science & Engineering** from Jawaharlal Nehru Technological University, Hyderabad

Technical skills

Skills	
Programming Language	Java
Databases	ORACLE
Web Technologies	HTML, JSON,XML, Angular JS 7(Basics)
Java SE Technologies	JDBC
Java EE Technologies	SERVLET, JSP
Frameworks	Spring, Spring Core, Spring Boot
ORM Tools	HIBERNATE
Webservices	Micro Services, Restful Web Services
Servers	Tomcat
IDE's	Eclipse, IntelliJ Idea
Tools and API's	Putty,GIT, Postman

Professional Experience

Company name	Duration
Gus Turbine Research Establishment – DRDO	Nov -2017 to Nov - 2018
Cameo Infotech	Jul -2016 To Oct-2017

Project Details

Project #1

Project Name	GTRE Portal	
Team Size	5	
My Role	Developer	
Company	GTRE – DRDO	
Duration	From: 11/17	To: 2/11/18
Software	JDK1.8, Spring, Spring boot, micro services, JAX-RS 2.0, JSON,, Intellij Idea, Pivotal Cloud Foundry, Oracle11g, RabbitMQ	

Responsibilities

- ✓ Individual development on each API.
- ✓ Implemented Controller, Service and DAO layers
- ✓ Created and implemented micro services for the project. Coding and debugging by using debugging tool.
- ✓ Maven used for Project Management Structure.
- ✓ Used GIT for code repository and as version control mechanism.
- ✓ Integrated Spring Boot with JDBC Template
- ✓ Involved in writing Restful Resource and exposing them over HTTP methods.
- ✓ Involved in the data base development by using oracle11g creating table inserting values into table, updating values of row, selecting rows.

Personal Details

Gender	Male
Nationality	Indian
Marital Status	Single

Declaration

I declare that the details above are correct and true to the best of my knowledge.
